

February 1 , 2020 – Skyway Constructs its 385<sup>th</sup> tower

Skyway Towers just completed construction of its 385<sup>th</sup> tower, a 195’ self-support tower located in Kalamazoo, Michigan. The multi-tenant communications tower will provide coverage and capacity to underserved neighborhoods northwest of downtown. Skyway’s tower is also well positioned to serve wireless carriers’ efforts to improve corridor coverage in the area, and to assist first responders as they deal with emergencies, accidents and other incidents. The tower is also available to Wireless Internet Service Providers that want to provide or improve wireless broadband coverage in the area. This tower is available for immediate collocation with ample ground space and tower heights.

### **About Skyway Towers, LLC**

Skyway Towers, a leading wireless communications tower developer with 385 towers in the air and more than 200 tower locations under development across the US for fast and easy collocation, was founded by a management team with roots in the wireless carrier industry. Skyway Towers is consistently recognized by its customers as the most responsive and streamlined tower company in the marketplace. The company understands the technical and time-sensitive nature of its customers’ needs and strives to exceed expectations.
